

#5

#6

#7

Find: $\angle AXB = \frac{108 + 62}{2} = \boxed{85^\circ}$

$\angle y = \frac{108 - 62}{2} = \boxed{23^\circ}$

#8

$$m\angle R = \frac{170 - 55}{2}$$

$$= \boxed{57.5}$$

#9

$$\frac{50 + x}{2} = 30$$

$$50 + x = 60$$

$$\boxed{x = 10}$$

#10

$$\frac{x - 42}{2} = 17$$

$$x - 42 = 34$$

$$\boxed{x = 76}$$

#11

$$\frac{125 - x}{2} = 22$$

$$125 - x = 44$$

$$-x = -81$$

$$\boxed{x = 81}$$

#12

$$m\angle P = \frac{85 - 5}{2} = \boxed{40}$$
